## Summary

Senior Software Engineer, specialized in **software engineering** mainly with *Django*, *SQL*, *React*, *Celery*, *Elastic Search*. Experience in **machine learning** with *Scipy* and *scikit-learn* and **big data** with *Spark*.

Strong **software design** skills, looking forward to developing a career as **Software Architect**, having gathered extensive knowledge in integrating a broad range of state-of-the-art patterns and technologies.

Active **free and open-source software** contributor and speaker.

## EXPERIENCE

---

*Please refer to his Linked-in profile to see the recommendations.*

### SENIOR SOFTWARE ENGINEER

September 2018 – today • *Eventbrite*, *Madrid*

Working on the migration of a monolith to a service oriented architecture as a Site Reliability Engineer.

🌐 [eventbrite.com](https://eventbrite.com) 🐙 [github.com/eventbrite/pysoa](https://github.com/eventbrite/pysoa)

### SENIOR SOFTWARE ENGINEER

July 2015 – August 2018 • *Udemy*, *Dublin*

Udemy for Business (UFB) team. Promoted to Senior in March 2017.

Most UFB's projects demanded work with distributed teams in three locations with distinct time zones.

Worked in a fast paced agile environment with Kanban/Trello.

Led the following projects:

- Hierarchical taxonomy management system for the course collection.
- Refactoring of the UFB's search system, moving from a dedicated implementation to a shared solution for the whole organization, which increased the team speed for developing experiments, new features, and the adoption from external developments.
- Development of a second layer of search for a course, returning also details of related lectures. It resulted on more search clicks, potentially driving more adoption.
- A RESTful public API, enabling customers integration to the platform.
- Instrumentalization to monitor the quality of the delivery, alarms that notified the team on fortuitous behaviours.

Development of a self-service system, to allow customers to create learning portals to small teams, accommodating a market that today represents an interesting share of the current business.

Migration to two new stacks:

- From a in-house PHP framework to Django. This improved the onboarding learning curve.
- From Angular 1 to React+MobX, which gave us more flexibility.

Development of data pipelines for UFB analytics in Amazon Redshift, Pinball, Python and ChartIO.

3rd party services integration: Intercom, Slack, Marketo, PingOne/PingFederate.

Technology stack:

- Backend: Django, Django Rest Framework, Celery, MySQL, Memcached, Redis, Elastic Search.
- Frontend: React, MobX, Webpack, Babel, Karma.
- Development: Docker, uWSGI, Fabric, Ansible, CentOS. Continuous Integration with Github and Jenkins.

## SOFTWARE ENGINEER

September 2012 – June 2014 • *Vivocom EU*, Spain

Extended the web application architecture (Yii+MySQL) with MongoDB, caching, background workers and querying, automation tools (Grunt), TTD, code quality linter, web security pentesting. Led the frontend implementation with CoffeeScript, CommonJS and Bower. Also trained the team for those new technologies/paradigms.

Software design with ArgoUML, Continuous Integration with Github, Agile development with Kanban/Scrum/Redmine. Server side performance optimization with PHPcache. Database query optimization of MySQL/MongoDB.

Built a real time chat for the website: Integrated an Ejjaberd chat server with a WSDL DaaS. Web client built in Ember.js.

100,000 registered users in its first year. Funded by the Spanish Ministry of Industry, Energy and Tourism as part of *Plan Avanza 2* program. It was awarded the Prize for Most innovative business project by the *Inspirational Festival* of 2013.
